## 1 Variables

To declare variables in sass we use $ sign, after that we can assign a value.

## 2 Nested class

Nested "components" are components inside another components.

```
$primaryBtn: rgb(182, 85, 153);
$textColor: rgb(58, 42, 42);

header {
  background: lightblue;
  display: flex;
  justify-content: center;
  color: $textColor;
  button {
    background: $primaryBtn;
  }
}
```
